

Final Project: Presentation

Instructions

1. 5 minutes to walk through each webpage, and all participants will be given a presentation sequence
2. Discuss aspects of your final project
3. Make your GitHub website public and do your presentation on GitHub
4. Please refer to “Final Project: Make Your Website Public on GitHub” section below to make your website public

Project Aspects

- Who is your artist/band? Or, what is your project topic?
- Why did you choose your artist/band, or project topic?
- What was your favorite part about building your website?
- What was your least favorite part about building your website?
- If you did the project again, what would you have done differently?
- What is something that was easier than you thought?
- What is something that was harder than you thought?

Final Project: Peer Review

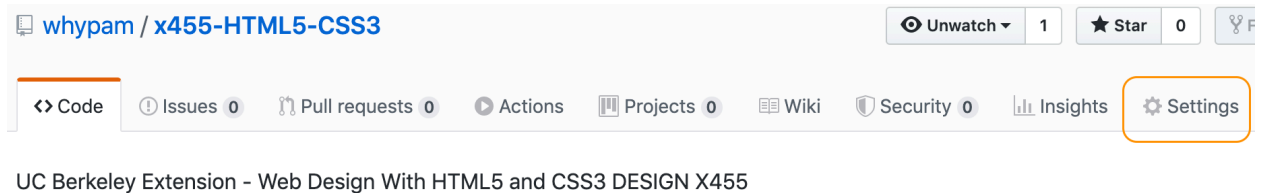

Instructions

1. Two participants will be paired up for a peer review.
2. One is a presenter and another is a reviewer.
3. Presenter will be given 5 minutes to present. After the presentation, reviewer will also be given 5 minutes to share the review. During the presentation, reviewer should take notes of the presentation.
4. All participants will be given a presentation sequence and whom s/he will review.
5. Read [The Purpose of Critique](http://howtocrit.com/) (<http://howtocrit.com/>) to prepare yourselves for getting and giving a critique.

Final Project: Make Your Website Public on GitHub

Instructions

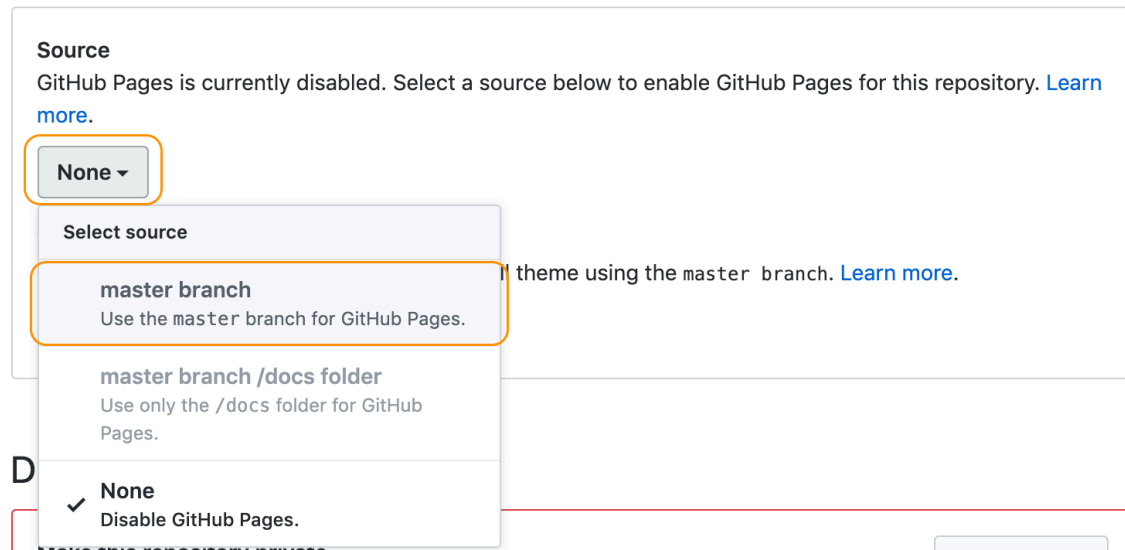

1. Login to your GitHub account and select your project repository
2. Select “Setting” tab on the upper right of the repository screen

3. Scroll down to “GitHub Pages” section, select the dropdown menu under “Source” and select “master branch”

GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

4. If it's your first time making your GitHub site public, it may take a moment to reflect the changes. Be patient.
5. After it's done, scroll down to GitHub Pages section again and you'll see your website has been published and a link is provided. Then, you can use the link to access your website on the Internet.

GitHub Pages

GitHub Pages is designed to host your personal, organization, or project pages from a GitHub repository.

Your site is ready to be published at <https://whypam.github.io/x455-HTML5-CSS3/>.
