Week 4 Assignment: Requirements

Mockups are where your project will begin to take shape. When wireframes are meant to quickly come up with a concept, mockups are where things take life.

You should
- Have chosen colors
- Be using actual text contents
  - If you do not have the text contents ready, you will use Lorem Ipsum as placeholder. [View Lorem Ipsum](https://www.lipsum.com/) -> https://www.lipsum.com/.

- Using actual images
  - If you do not have all your images, duplicating images is acceptable in mockups.

You should not
- have any wireframe elements

Media

Media page is a showcase of your band or artists photos and videos.

Tasks:
- x8 thumbnail images
  - Can show less if elements are hidden away in some manner using a Carousal, View carousel design examples -> https://bashooka.com/coding/web-carousel-design-examples/
- x4 videos
  - Can show less if elements are hidden away in some manner using a Carousal, View carousel design examples -> https://bashooka.com/coding/web-carousel-design-examples/

Merch

Merch page is your shop. The user flow will stop here so none of your items should link to any other pages. The main goal of this page is to filter merch items with JavaScript

Tasks:
- x6 products
- x2 product categories

Tour Dates

Tasks
- HTML Table
  - x10 dates (10 table entries)
  - Must have following columns
    - Venue (must have hyperlink)
    - Location
    - Date
    - Time
    - Where to buy tickets (must have hyperlink)

Note:

If you have hidden content such as a Mobile Menu, you need to show both Active and Non Active states. In the case of the mobile menu show what it looks like closed and opened. View hidden content examples ->
https://www.w3schools.com/w3css/tryw3css_templates_analytics.htm

Do Not Use
- Shopping carts
- Search

We will not be touching base on this type of functionality in this project

Project Setup

You can use any software to make your digital mockups
- Sketch
- Photoshop
- Illustrator
- Figma (https://www.figma.com/)

Suggestion: You may start with a canvas that's 1,400px width by 1,000px height.

Remember as you start to layout content your height can change and that's ok.

You than make all your content fit inside a 1,200px wide content container that's centered on the canvas. This means your content has padding on left and right of 100px. If you have images that are full screen, you will stretch it beyond the content container touching the edges of the canvas. The rest of your content will remain inside the content container.

All content needs to be displayed in your mockups - this means nothing should be cut off vertically

Submitting Homework

- Submit each page by itself
  - I will not accept all pages on a single canvas
- Name your files with the page name it represents
  - Ex. media.jpg, merch.png, tour-dates.jpg, etc.
